

# **eCORNERSTONE WISH LIST**

## **Cornerstone User's Group**

1. Is there any alternative to printing the Participant Master Record? Currently, when they are printed to file, the default filename for each individual record is the same. A unique name can be given, but the process is fairly cumbersome. What is the possibility of having an automated save to a specified drive or storage device; this could create a savings to the users (time, printing, storing, etc).
2. Can a question be added to the 706 (Home Assessment) Screen to address lead? There is a question on the 700 screen which does – Have you or your children ever lived in a dwelling built before 1978?
3. Please add reminder boxes for abnormal responses to the 700 Assessment Screen. This reminds staff members to complete the other required assessments.
4. Would it be possible to have spell check in the Case Notes?
5. Would it be possible to send a broadcast message to the Employee ADMIN Section? (NOTE: A discussion was held at the October 2004 Cornerstone User's Group Meeting. This may be possible to be implemented with eCornerstone. Jo Anne Durkee, DHS Chief, stated this feature will stay the same and will be kept locked. She also stated DHS may be able to look into this request for eCornerstone.)
